Kinetic Gig Speed Fiber has up to 1 Gig upload speed, which is more than 25x faster upload speed than the best advertised 1 Gig cable internet speed, which has 30-35 Mbps upload speed as of June 2024. **Kinetic Internet:** Kinetic cannot guarantee specific upload/download speeds, uninterrupted service, or error free service. Speed availability, capabilities, and provisioning vary depending on several factors: network and terrain conditions; Internet, website, or network congestion; effect of wi-fi use; number of concurrent users; device limitations; and customer location. Speeds ≥ 25 Mbps are provisioned in a range, including a minimum and maximum speed. Kinetic will provision the fastest speed within that range but may be less than the maximum. **99.9% Service Reliability:** As measured by Windstream from March 2023 to March 2024, Kinetic service reliability is calculated by dividing Available Customer Hours by Total Customer Hours, excluding planned maintenance, emergencies (like hurricanes, winter storms, floods), and other uncontrollable events. **Whole Home Wi-Fi:** additional Kinetic Wi-Fi Extender is \$10.99/month. Taxes, fees, and surcharges are applicable. Other restrictions may apply. An Internet Activation fee and a Professional Installation fee may apply. **Whole Home Wi-Fi Set Up:** Whole Home Wi-Fi installation involves Kinetic connect the Kinetic Gateway (modem), Wi-Fi extenders (as needed), & Wi-Fi capable devices to the home's network. ©2025 Windstream Intellectual Property Services, LLC.
